OS needs to grow!

Hazards of Open Science

- **Failure (not delivering a radical and positive change, not attracting our biggest talents and nurture diverse communities).**
- **To become an exclusive movement of public research that continues to enlarge the disconnection with Society.**
- **To associate "Open" with "Ignore", especially when it comes to resources that are needed to perform 'open' methods.**
- **To build blocks of 'net beneficiaries' that rarely move to 'contributors' side.**

Open Science to succeed: an inclusive movement!
Not exclusive. Not disconnected.

Recommendations

Each chapter produces a one page report.
To be used for further engagement within
research institutions and with external
stakeholders.
